

SMART INDIA HACKATHON 2026

- **Problem Statement ID – SIH26075**
- **Problem Statement Title-**Participants are invited to design and develop ****CAPACITY CONNECT A Digital Capacity Building and Learning Management Portal**** to support organizational training, competency development, and knowledge sharing through a centralized web-based platform.
- Theme-Smart Education**
- PS Category- Software**
- Team ID - SIH26-A0H-T171**
- Team Name - TECH NOVA**

CAPACITY CONNECT

The problem today

Training records live in scattered spreadsheets and apps

Finishing a course does not prove the skill was learned

Every learner gets the same training, gaps or not

Our idea, step by step

Learner takes a quick skill test

AI compares current vs required skill

Personal learning path is generated

Re-test proves real skill growth

What makes it different

- Measures real skill growth, before vs after — not just course completion
- A transparent scoring rule anyone can check, not a black box
- One shared view for learners, trainers, and admins

Technology Stack

Implementation Workflow

System Architecture

Technical Feasibility

- Uses web-based, modular architecture
- AI features can be integrated through existing APIs/models
- Can start with a small MVP and expand
- Uses commonly available technologies and databases

Operational Feasibility

- Trainee, Trainer & Admin dashboards
- Easy course/resource management
- Automated assessments, feedback and certificates
- Simple interface requiring minimal training

Financial Viability

- Mostly open-source / low-cost technologies
- Cloud deployment can scale according to usage
- Reduces manual effort in training and assessment
- Digital resources reduce recurring administrative costs

Scalability & Sustainability

- Start with one organization / one skill domain
- Expand to multiple departments and skill categories
- Supports increasing users, courses and assessments
- Continuous skill-gap analysis and personalized learning

Risk → Mitigation

Limited initial data

Use predefined skill frameworks

AI accuracy

Human-reviewed recommendations

Data privacy

Role-based access & secure storage

Large user base

Cloud-based scalable architecture

Development time

Build MVP first, then add advanced AI

FOR LEARNERS

Personalized, not generic

- ✓ Told exactly what to study next, not a whole course
- ✓ See a real before/after skill score, not a guess
- ✓ A certificate that actually proves the skill
- ✓ Motivated by visible, honest progress

FOR TRAINERS

Trainee • Trainer • Admin

- ✓ Instantly see which learners need help, and with what
- ✓ Spend effort where it is actually needed
- ✓ Less guesswork than attendance-based tracking
- ✓ Simple dashboard, minimal training to use it

FOR ORGANIZATIONS

Proof, not paperwork

- ✓ Real proof training worked, not just certificates issued
- ✓ One dashboard for all learners and all courses
- ✓ Less wasted time on training people don't need
- ✓ Clear, honest reporting on skill growth

SCALABLE & GROWING

Small today, bigger tomorrow

- ✓ Starts with one role and a handful of skills
- ✓ New roles or skills just become new modules
- ✓ Works for colleges, companies, or skill missions
- ✓ We learn real frontend, backend and data skills too

Our impact, in one number

Skill growth

45% → 82% example

Training time

spent only on real gaps

Certification

proof-based, not attendance

Rollout

1 role today, any team next
